पंजाब PUNJAB

• Construction of housing structure for RO plant. However FORTUNE ELECTRO INDIA i.e. party No 2 will submit the design & drawing of housing structure which should be stable & should last for 10 to 15 years. Expansion of treatment system should also be considered while designing housing structure.

- Creating a network of service engineer, find and train the operator of the plant
- Delivering potable water at water works site that meets WHO norms at all times
- IEC activities, awareness campaign, maintenance of accounts and collection of tariff etc.
- Community members will carry water in 20 liter jerry cans the cost of which will be paid by registered users.
- The plants are to be located in water quality problem wards of the Corporation where TDS is higher than 500 mg per litre. The plants are proposed to meet the minimum need of water for drinking and cooking primarily. The capacity of the plants in terms of liters per hours shall be 2000 LPH. The TDS of raw water from ground water sources shall be ranging form 1000 to 5000 mg per ltr. However FORTUNE ELECTRO INDIA is to analyze the water samples from their own testing laboratory before designing the treatment system.
- The number of R.O System can be increased or decreased as per the requirement of the party No 1.
- The total dissolved solids (TDS) of product water obtained from RO plant shall be as per the Annexure-II of this document.
- The FORTUNE ELECTRO INDIA will need to supply a suitable technology (most likely a combination of pre-treatment with Reverse Osmosis), to treat ground water in each block and provide WHO standard potable water. The main components in the scope of supplier shall be as under:
